## Spy Satellite to Spot Missile Site Anywhere

oping a satellite system to of his statement, "include lospot ballistic missile launch cation of ballistic missile points anywhere in the world, launch points, detecting nuincluding Red China, accord-clear detonations for missle ing to testimony before a Sen-strike reporting, attack assessate Committee.

The Defense Department pulled aside the curtain of secrecy to give a two-paragraph peek at the early warning program in a statement by John S. Foster Jr., director of Defense Research and Engineering, before the Senate Aeronautical and Space Committee.

The testimony indicated refinements of the super-secret spy satellite system.

Foster said the capabilities and mission of the early warning program are being reoriented and extended.

"The continuing advance of technology now will allow us so add significant new and additional capabilities to this satellite," he said.

These capabilities, Foster .
